March 2022

“The leaders of tomorrow are our focus and the foundation of the future. Our duty is to advance their skills and knowledge to continually enhance the quality of public administration.”

HH Sheikh Mohammed Bin Rashid Al Maktoum

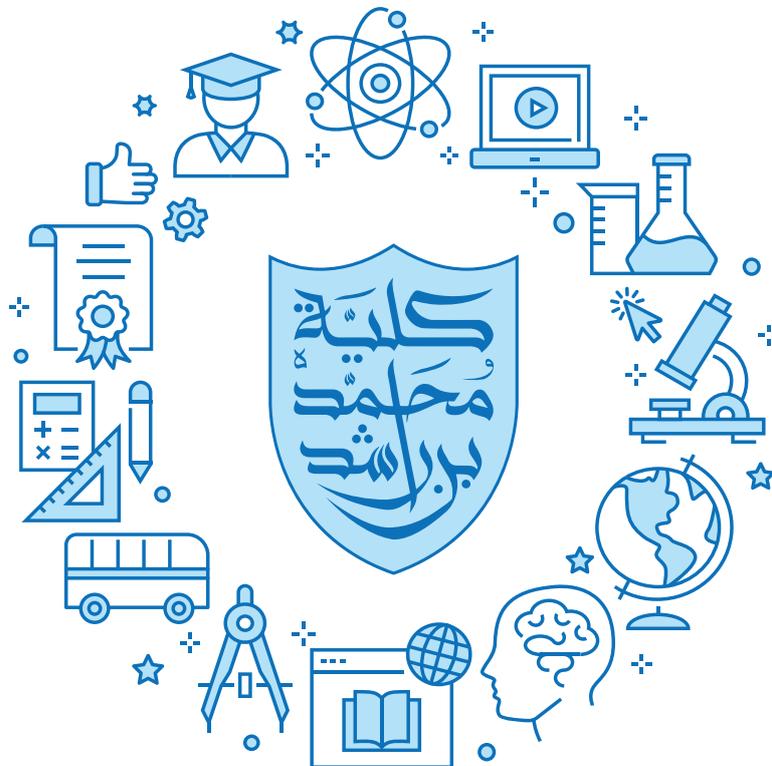

About MBRSG

Launched in 2005 under the patronage of His Highness Sheikh Mohammed Bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai, as the first research and teaching institution focusing on governance and public policy in the Arab world. The School aims to support good governance in the UAE and the Arab world, and empower future leaders through an integrated system offering academic and training programs, as well as research and studies.

The School's operations are founded on global best practices developed in collaboration with the Kennedy School at Harvard University, and it is considered a unique model for academic institutions in that it focuses on the practical side of governance. The School also collaborates with several government and private institutions both regionally and internationally.

The overall design and implementation of training programs is built on the foundation of scientific thought and is inspired by the reality of Arab public administration and with a view to addressing the issues and helping future leaders meet the challenges facing public administration in various parts of the Arab world. The School also organizes international and regional conferences and specialized workshops, and holds forums to facilitate the exchange of ideas and knowledge between Arab region and the world.

Executive President Foreword

The Mohammed Bin Rashid School of Government (MBRSG) has firmly established itself as the foremost and pioneering research and teaching institute focusing on leadership, governance, and public policy in the UAE and the Arab world since its launch in 2005.

The School has made tremendous strides, guided by the vision and ambition of the leadership of the UAE and Dubai, and we remain as dedicated as always to our mission to influence and empower young leaders to spearhead the transformation we aspire to in the UAE and the Arab region.

By all standards, 2021 was an extraordinary year. The world breathed a sigh of relief as a gradual global recovery from the heavy economic burden of the COVID-19 pandemic began to take shape. Amidst this 'New Normal', MBRSG sought to adapt its programmes to cater to the rapid developments transforming our world. This, in turn, brought an entirely new way of thinking that we sought to impart on participants in these programmes, which they can carry with them as they reassume their positions at the helm of various government entities.

The School was proud to see the first cohort of the 'Future Pioneers' programme graduate in 2021, with 13 promising young Emirati leaders taking part. This is in addition to the 285 graduates from our Master's programmes across all specialisations in administration, innovation, and public policy. Integral to our strategy is collaborating with prominent partners – both domestic and international. On that note, 2021 saw MBRSG ink new partnership agreements with such prestigious institutions.

Thus, it gives me great pleasure to welcome you to our 2021 Annual Report. This valuable document captures our main achievements over one year, and includes statistics, milestones, and key deliverables.

MBRSG Strategy 2017- 2021

Strategy Cycle

During the year 2021, the school conducted market situation analysis and competitive advantage analysis to plan the upcoming strategy of 2022-2024 in alignment with Dubai Government mission and vision. Several brainstorming sessions that involved MBRSG stakeholders and Ministry of Higher Education and Scientific Research took place to determine the goals, mission, vision and institutional values of the new strategy, and design the school's strategic map.

Future Government Programs

Master of Public Administration (MPA)

The program is intended for students seeking to advance their career in public / private service or nonprofit management. The program helps to develop knowledge, skills and competencies needed to analyze, develop and implement policies and programs that address important issues related to the public sector and society.

Master of Innovation Management (MIM)

The Master of Innovation Management program is designed for professionals working in and with the public sector, who wish to pursue a career in innovation management. The MIM program reflects the National Advanced Sciences Agenda 2031, UAE Vision 2021, and the aspirational goals outlined in the Centennial Plan 2071.

Master of Public Policy (MPP)

The Master of Public Policy (MPP) program is designed to provide education which complies with international norms, for professionals to develop further as leaders in a variety of roles, including public policy analysis and planning, public management and services, research institutes, government orientated positions within the private sector and the third sector organizations. The program is offered with specializations in Education, Health, Social Policy, Science and Technology, and Sustainable Development.

Executive Master of Public Administration (EMPA)

The 'executive' element of the EMPA program is primarily designed to educate working executives, managers, and other business leaders in a cohesive learning environment that is designed to fit the variety of different students' schedules. The EMPA program requires students to attend blocks of lectures, and then complete a large portion of the work on their own time.

Summary

Innovation is playing an ever-greater role in the economic trajectories of nations. The post COVID-19 era suggests that the pace of recovery of an economy and its resilience to external shocks are contingent on the strength of its innovation ecosystem, of which 'clusters' are an essential element. This policy brief provides an overview of the specificities of successful clusters and the many roles they play in fostering innovation on a national level. It highlights the ways in which robust cluster systems have helped minimize the impact of the pandemic on innovation stakeholders. Finally, based on extensive primary research, this brief concludes with policy recommendations towards a clusters approach to innovation that could advance economic value generation in the UAE.

Clusters as Drivers of the Innovation Ecosystem: Policy directions for re-designing clusters in the UAE

Salma Pefess with Fadi Salem

Introduction

Investing in innovation leads to economic growth and prosperity. It is through innovation that businesses find ways to generate more value from existing resources. Research shows that increased innovation correlates closely to higher productivity levels, across sectors of the economy. As a result, innovation is, directly or indirectly, the main driver of productivity growth and is the principal source of national prosperity.

In the last decade, in line with its efforts to become a knowledge and innovation-based economy while fostering economic prosperity, the UAE has cemented its status as a regional and global innovation hub. It had done so by investing in entrepreneurship, encouraging STEM education, and building facilities and universities that act as levers of innovation. Given the ambitious goals of the country's industrial, technological and scientific fields, the UAE's focus must be to continue heavily investing in innovation by developing high-added value, internationally competitive goods and services, and ascertain its place in global value chains.

برامج «محمد بن راشد للإدارة الحكومية» أداة فعالة نحو حكومة أكثر كفاءة

دبي - البيان
تتفق «مركز محمد بن راشد للإدارة الحكومية» التي تأسست في عام 2007، على أنها أداة فعالة نحو حكومة أكثر كفاءة، وذلك بفضل البرامج التي تقدمها، والتي تهدف إلى تحسين الأداء الحكومي، وتعزيز الشفافية، وتحسين الخدمات المقدمة للمواطنين.

وقال الدكتور علي بن سباع المري، الرئيس التنفيذي لكلية محمد بن راشد للإدارة الحكومية، أن برامج التعليم التنفيذي تقدم تعلم عميقاً للأفراد، وخاصة في مجال الإدارة العامة، والتي تعتبر من أهم الركائز لبناء الدولة الحديثة.

وتابع المري، أن البرامج التي تقدمها الكلية، مثل برامج الماجستير والدكتوراه، تهدف إلى تطوير المهارات القيادية، وتعزيز القدرة على اتخاذ القرارات الاستراتيجية، وتحسين الأداء الشخصي والمؤسسي.
